Vince Macaluso Collection and
Contra Costa Newspapers

The City of Pittsburg gratefully acknowledges the
dedication and hard work of so many who
contributed to the design, construction, financing
and furnishing of the Pittsburg Civic Center.

DID YOU KNOW...

The Pittsburg Civic Center measures 71,000 square feet. The main lobby area, or rotunda, is decorated with a geometric pattern in Brazilian blue granite. The center has 38,600 sq. ft. of windows. That includes exterior windows and the glass walls of the conference rooms throughout the building.

WELCOME TO PITTSBURG'S NEW CIVIC CENTER

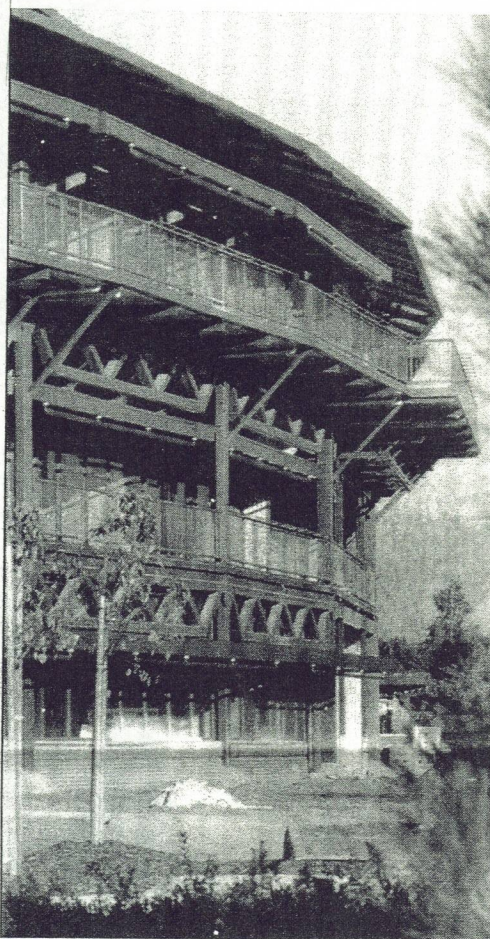

Photo by Joel Summerhill

The City Council and staff welcome you to Pittsburg's new Civic Center, located at 65 Civic Avenue.

This impressive building of glass and steel is the City's newest landmark, rising three stories above Highway 4 and nearby City Park. This special section is your guide to the Civic Center, which officially opens with a celebration Saturday, February 5.

The Center is the result of years of effort by several City Councils, city employees, contractors and the community to bring a dream to reality. The \$23 million construction project was financed through the Pittsburg Redevelopment Agency, minimizing the impact to the city's General Fund.

Congratulations to all who contributed to the project, including Architect and planner Fani Danadjieva Hansen, AIA and General Contractor Lathrop Construction Associates of Benicia. The result is a building to make the community proud.

The Civic Center marks the first time that core services to the public are housed in a single building. Several features were designed specifically to make these services more accessible. As this new Civic Center brings together city staff, it also represents a coming together for our community.
